Conexpo looms

Following on from our initial preview in the last issue of the Cranes & Access we now have the final Conexpo round up before the year's big equipment exhibition opens in Las Vegas on Tuesday March 7th. We have more information on what to expect as well as a complete listing of exhibitors associated with cranes, aerial lifts and telehandlers - more than 300 in total - although the majority are component and ancillary equipment suppliers.

One of the most notable things about this year's event is the number of first-time European exhibitors in the lifting sector, while at the same time a number of regular aerial lift exhibitors have pulled out of the show, due to its proximity with the ARA Rental show in Orlando which is without question a better event for aerial work platforms. That said there is plenty to see at Conexpo and the organisers have made a greater effort this year to accommodate all of the crane, access and telehandler companies in the Gold Lot which makes life much easier. Cranes & Access has a stand and will be distributing the bi-lingual Vertikal Conexpo guide.

So what's new? **Horyong becomes ZEE crane**

If you missed it at Bauma there is another chance to see the battery powered Horvong carrydeck crane from South Korea. Branded for the North American market as the ZEE crane by Zero Emission Equipment, the company will have two models on display - the four tonne 4500 and the new eight tonne 9000. Both cranes have long booms for their type, offsetting jibs and a work platform option.

Link-Belt

Since our last issue Link-Belt has announced another all-new product for the show - the 70 tonne 75RT - the first of a new generation of Rough Terrain cranes. The new crane will have a five section 43.3 metre full-power boom, plus a 10.7 to 17.7 metre bi-fold swingaway extension with the option of a three-part version to provide an additional short three metre heavyduty extension. An all-new tilting cab is said to offer 20 percent more visibility and is fitted with the company's Pulse 2.0 system with 10 inch display screen, wi-fi hub and a wide range of monitoring cameras located around the crane. While the new 'V-CALC' outrigger set-up system - short for Variable

Skid Crane

If you are looking for something completely different the 2.3 tonne capacity Skid Crane might be just the ticket. It is a three section 13.5 metre full power telescopic boom, with rolling outriggers and stabilisers which attaches to the front linkage of a standard skid steer loader, using it as a cab, power source, chassis and counterweight. If the online video is to be believed it looks relatively effective for pick & carry work and manages its 2.3 tonnes capacity at 2.7 metres. It can lift 450kg to its maximum hook

Enteco

Italian foundation crane company will show its new 18 tonne E8018 compact crawler crane which weighs just 18.5 tonnes, complete with a 16 metre folding lattice boom. The longest boom is 18 metres, a short auxiliary jib adds around two metres to that and has three tonnes capacity. Overall track width extends from 2.5 to three metres.

Maeda/Jekko

Maeda will focus its efforts on the recently launched six tonne CC1485S-1 which is now in production. Jekko will also show its new six tonne mini crawler crane, the SPK60, which has already created quite a bit of interest in the US.

Conexpo 2017

Tadano is launching its new Mantis telescopic crawlers with the 60 tonne GTC 600 and its 36 metre four section main boom, and the 80 tonne GTC 800 with its heavy duty 43 metre five section main boom. Both offer additional reach with a 17.7 metre bi-fold swingaway extension. The new cranes have plenty of new features including automatic switching to plus four degree load charts when the crane is out of level. The new product on show will be the upgraded ATF 110G-5 which offers multiple counterweight configurations, the new AML-F load moment system with on-board diagnostics and symmetrical outrigger set-up.

Tadano ATF 110G-5

Palfinger

Palfinger is pushing the boat out this year with big equipment from Europe alongside its North American-built products. The loader crane range will be topped by the PK 165.002 TEC 7 making its US debut following its launch at Bauma last

Conexpo 2017

year. The 125 tonne/metre crane has a maximum capacity with jib of 8.2 tonnes and a maximum lift height of 35 metres with the PJ 240 jib or 40 metres with the PJ 300L. The unit is designed for trucks of 32 tonnes or more. At the other end of the scale is the PAL Pro 39 Mechanics Truck crane.

The Palfinger Platforms display will be topped by the 103 metre WT 1000 on a five axle Faun carrier aimed at the North American wind turbine sector. Locally-built ETI Aerial Lifts will also be a key feature aimed at the telecommunications, street lighting and utility markets with heights up to 17 metres.

Genie

Genie is keeping quiet about some of its exhibits but we do know that one product will be the new 125ft SX125XC and we would not be surprised to see the ZX135 on the more compact X chassis. But more important is to check out some of the exciting developments the company is launching to meet the new ANSI and CSA standards, including the XC models which offer dual capacities. In most cases this will include the existing unrestricted capacity plus a higher capacity with outreach or jib restrictions and automatic management. The other is the slope warning and cut out. The company is looking to

offer some advantages to offset the imposition of a cut-out on boom lifts, such as safe slope working with restricted working envelopes. This is definitely something worth checking out.

Sany

Sany will have five cranes on display hopefully including at least one of its latest generation of All Terrain cranes, in particular the new 100 tonne SAC1000 shown at Bauma China.

Ruthmann

Ruthmann platforms can be found on two stands at the show, the first is on its distributor Time Manufacturing which focuses on the larger Ruthmann models marketed under the Versalift Speedbird brand. The unit on show is a 72 metre T2335A on a five axle truck. Sold to Blade Access it has a 600kg platform capacity with 36 metres of outreach from a five section boom and three section articulated jib.

A Ruthmann can also be found on the Reachmaster stand which is the Ruthmann/Bluelift dealer. It will focus on smaller models and will show a 33 metre model mounted on a Ford F650 with a total weight below 26,000lbs (11.8 tonnes) and can be driven with regular driver's license.

Elliot

Elliot Equipment will show its all-

new cab for large boom trucks/truck cranes and the new 18 ton 1881TM boom truck.

Time

Time Versalift - now under new ownership - will have a 56 metre Versalift PHX-180-I mounted on a five axle truck chassis with more than 30 metres of outreach, an up and over height of 36 metres and a maximum capacity of up to 907kg. The unit also has a material handling

function. Also look for an insulated model developed as a joint venture with Ruthmann, the Skybird 151.

Raimondi

Italian tower crane manufacturer Raimondi is making its Conexpo debut located in the Silver Lot so do pay a visit. The company is principally aiming to send a message that it is looking to expand its customer and distribution base in North America. It will also launch

its new 14 tonne LR213 luffing jib crane, available with a 55 metre jib, along with the MRT159.

TCA

TCA Falcon and distributor
Reachmaster will unveil for the first
time anywhere, the all-new Falcon
FS108Z Vario, (FS330Z Vario) the
first of a new line of machines
with variable track widths. The
new model uses the basic design
of the lighter undercarriage from
the FS105T (FS320C) that was
launched at Bauma, combined with
the superstructure of the FS108Z,
(FS330Z) to offer the best outreach
in its class - expected to be close
to 19 metres - along with a more
compact footprint.

Almac/Bibi

The global launch will be the allnew Almac Bibi BL33 EVO with an additional 2.1 metres of platform height plus dynamic levelling allowing it to maintain its level while driving. The new machine will be shown alongside the Bibi HE26

Merlo, helping you build a better future...

with NO INTEREST to pay!

GO further, reach HIGHER with Merlo telehandlers

MERLO - PIONEERING TECHNOLOGY SINCE 1964

Conexpo 2017

narrow machine, which features levelling jacks in addition to the normal chassis levelling capability. This will be its US debut.

.ICE

The highlight of the JCB stand will be its new scissor range, as well as a 50ft diesel AJ500D Rough Terrain articulated boom lift. The company may also have the new 4,000kg/17.5 metre

540-180 Hi-Viz telehandler and its new dual technology transmission combining the best characteristics of powershift and hydrostatic drives.

Liebherr

Liebherr will unveil the new four axle LTM1090-4.2. All Terrain with VarioBallast variable counterweight system, Variobase outrigger set-up system and can be configured with 10 or 12 tonne axle loadings. The first unit has been sold to Philadelphia-based Sautter Crane Rental. The company has also confirmed that it will exhibit its new 250 tonne LTM 1250-5.1 and 450 tonne LTM 1450-8.1 All Terrains alongside the units covered in the last issue of the magazine.

MEC

MEC is launching a new range of slab scissor lifts - built to MEC designs by Dingli - with a number of classic MEC features and material

handling attachments. The new range includes six models from a 13ft 1330SE micro scissor, with regular 19, 26 and 33ft slab scissors topped by the 40ft 4046SE and unusual 45ft 4555SE. The new models have direct electric drive standard sheet material carriers, faster drive speed and

cycle times and fewer hydraulic connections.

Xtreme Manufacturing

Xtreme will show a range of its heavy-duty fixed frame telehandlers with capacities from 9,000kg to the giant 32 tonne XR7038.

Magni

The star exhibit on the Magni stand is the world's highest reaching telehandler, the 5,000kg capacity 39 metre RTH 5.39S. The company

Curtiss-Wright Industrial Group is a globally recognized leader in providing components and sub-systems which enable customer-specific solutions for on- and off-highway vehicles.

The familiar legacy brands of Arens Controls, Penny & Giles, PG Drives Technology, and Williams Controls make up the Curtiss-Wright Industrial Group. Together, we use our decades of experience over a wide range of applications, to provide our customers with innovative and reliable solutions.

Reach out to one of our Industrial Group experts to discuss your next project and learn more about Curtiss-Wright Industrial, our capabilities, and how we can help you succeed.

is also launching its Romastor fork rotator that allows up to 2.5 tonnes to be rotated by up to 90 degrees to each side of the boom.

Merlo

Merlo is also focusing on its line of 360 degree telehandlers, alongside its more compact straight frame models.

Klubb

Making its Conexpo debut the French manufacturer is testing the market and looking for dealers for both North and South America. It will show a 12 metre K26 van mount on cut down Mercedes Sprinter chassis.

Wolffkran

Wolffkran will show its largest flat top tower crane, the 7534 Clear with a maximum capacity of 16.5 tonnes and 2.9 tonnes capacity at the maximum 75 metre jib tip.

Snorkel

Snorkel will show a wide range from its boom and scissor range, while launching the new 16ft mast-type TM16E - derived from the highly popular TM12 - with direct electric drive. Weighing in at just under a tonne it is ideally suited for moving between floors in a standard elevator.

Dieci

Dieci will have its 30 metre Pegasus 45.30 360 degree telehandler on display, along with a new range of four US style high boom straight frame telehandlers.

Manitou

The company has said little about what it will show but expect to see the US launch of its ultra-buggy type telehandler the two tonne/four metre MT 420.

Dinolift

Reachmaster will show the Dinolift RXT87 (265RXT) North America, launched two years ago it is finding favour for its low overall weight of 4,500kg. The unit on display will be equipped with a tree-care package which includes additional protection for outrigger cylinders and wide turf tyres.

Bluelift

Staying on the Reachmaster stand the Bluelift line will be represented by the 26 metre B85 Combo with lithium ion battery pack combined with a choice of gas or diesel engine. Launched in the US last year the machine has been highly successful.

Conexpo 2017

Winlet

Reachmaster will unveil the new Winlet glass handlers, the 785kg capacity Winlet 1730 alongside the recently launched Winlet 2200.

Skyjack telehandlers

Watch out for Skyjack's largest SJ telehandler to date - the 17.1 metre/5.4 tonne SJ1256 TH prototype launched last month. The new machine can take 2.721kg to its full height without outriggers, or 3,175kg with outriggers set. Maximum forward

JLG TAKES BOOM LIFT PERFORMANCE TO NEW HEIGHTS. AGAIN.

Wire rope replacement intervals from JLG raise the bar for machine longevity. An industry first exclusive to JLG boom lifts, this new standard extends wire rope and sheave replacement intervals to 12 years (or 7,000 machine hours).

JLG.
