# INTRODUCING THE NEW HIAB ALUMINIUM SUBFRAME

## HIAB ALUMINIUM SUB FRAME CONCEPT OFFERS LIGHTWEIGHT, MODULAR SOLUTION FOR ALL INDUSTRIES.

Hiab, part of Cargotec, is set to launch a new aluminium sub frame following a successful prototype development and industry reception over the past 6 months.

Developed to meet the needs of customers who want to maximise payload, the aluminium sub frame boasts a unique set of features, all of which have been designed to increase productivity and reliability, while reducing installation costs and time.

The sub frame was initially displayed at the Commercial Vehicle 2017 show on a Volvo builders' merchant truck made by Peterborough-based leading manufacturer of trailers, curtainsiders, box vans, refrigerated & rigid bodywork, Lawrence David Limited.

The concept for the sub frame was developed over 3 months, with the prototype manufacturing completed several months after.

Manufactured completely from aluminium, the new sub frame has lightweight properties that reduce the need for specialist welding, making it quicker and easier to install. With no paint or galvanised coating to chip over time, the sub

frame also has much greater durability, giving improved total cost of ownership.

Designed as a 'bolttable' and modular concept, the sub frame will fit all different chassis types and will be adaptable to different manufacturers' requirements. Its modular design will appeal both to many different industries, including direct customers and also third party suppliers who can install it on their customers' behalf. Builders' merchants in particular will benefit from the durability, ability to maximise payload and fast installation time, all helping to boost productivity.
