Make the most of your visit

It's spring and we are back in Paris, anticipating a positive 2018, with the Eurozone recovering and the French economy gathering pace, as the new president raises France's profile on the world stage, while possibly benefiting from uncertainty in the UK as it moves toward the EU exit door.

Intermat has struggled for some time to maintain its status as one of the three big international construction equipment exhibitions, on the three year circuit with Bauma and Conexpo. Whether you believe that Intermat deserves its place on the international arena or not, the fact is that it is still a good shop window for Francophone visitors, along with a good turnout from the Middle East and South America. In spite of some manufacturers misgivings, there are plenty of new products to see this year, while a good number of the industry's senior executives are on hand to meet and talk.

This guide, both print and/or digital, will help direct you around the lifting equipment exhibits in the most efficient manner, highlighting key new products and developments to look out for. As usual we have listed every crane, telehandler and access exhibitor by brand and company, along with associated products and services. Coupled with large maps, which should make finding products of interest a breeze. Don't forget the guide to Paris at the back and more importantly make the most of your visit.

Do stop and see the Vertikal team, we are between outside areas Ext.5 and Ext.6. Have a great week.

Leigh W Sparrow

Profitez au maximum de votre visite.

C'est le printemps, nous revoilà à Paris, prévoyant une année 2018 pleine d'espoir avec la zone euro qui se redresse et l'économie française reprenant un bon rythme, alors que le nouveau président améliore l'image de la France sur la scène mondiale, profitant peut-être d'une situation incertaine en Grande-Bretagne, qui se dirige vers la porte de sortie de l'UE.

Depuis quelques temps, Intermat s'est battu pour rester dans le circuit et garder sa position, comme l'une des trois expositions triennales majeures de matériel de construction, avec Bauma et Conexpo. Que vous pensiez, ou non, qu'Intermat mérite sa place dans l'arène internationale, le fait est que c'est toujours une bonne vitrine pour les visiteurs francophones, avec de nombreux utilisateurs venant du Moyen Orient et d'Amérique du Sud. Malgré l'absence de quelques constructeurs, il y a beaucoup de nouveaux produits à voir et plusieurs cadres supérieurs de l'industrie sont disponibles pour des rencontres et discussions. Ce guide, aussi bien sur papier qu'à lecture numérique, vous guidera, de manière efficace, parmi les stands d'équipements de levage, signalant les nouveaux produits phares et développements à voir. Comme d'habitude, nous avons établi une liste de chaque exposant de grues, chariots télescopiques, nacelles par marque et constructeur en même temps que les produits associés et services. Accompagné de grandes cartes, ce guide devrait vous permettre de trouver très facilement les produits qui vous intéressent.

N'oubliez pas le guide de Paris à l'arrière de la brochure et surtout profitez un maximum de votre visite. Rendez-nous visite sur notre stand Vertikal; nous sommes entre les zones extérieures 5 et 6. Bon séjour à Intermat.

Leigh W Sparrow

FULL SPEED AHEAD!

We're on the road to Donington Park for an even bigger **Vertical Days**.

Strap yourself in and be a part of the UK's largest lifting equipment event.

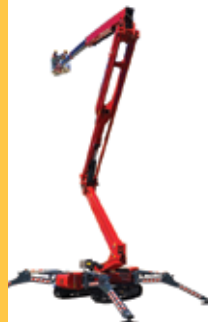

**Reserve the dates now
May 16th-17th 2018**

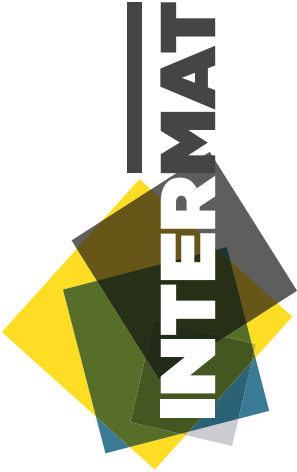

Registration is now open for both exhibitors and visitors. Go to www.vertikaldays.net

The new AC 300-6

Above and beyond.

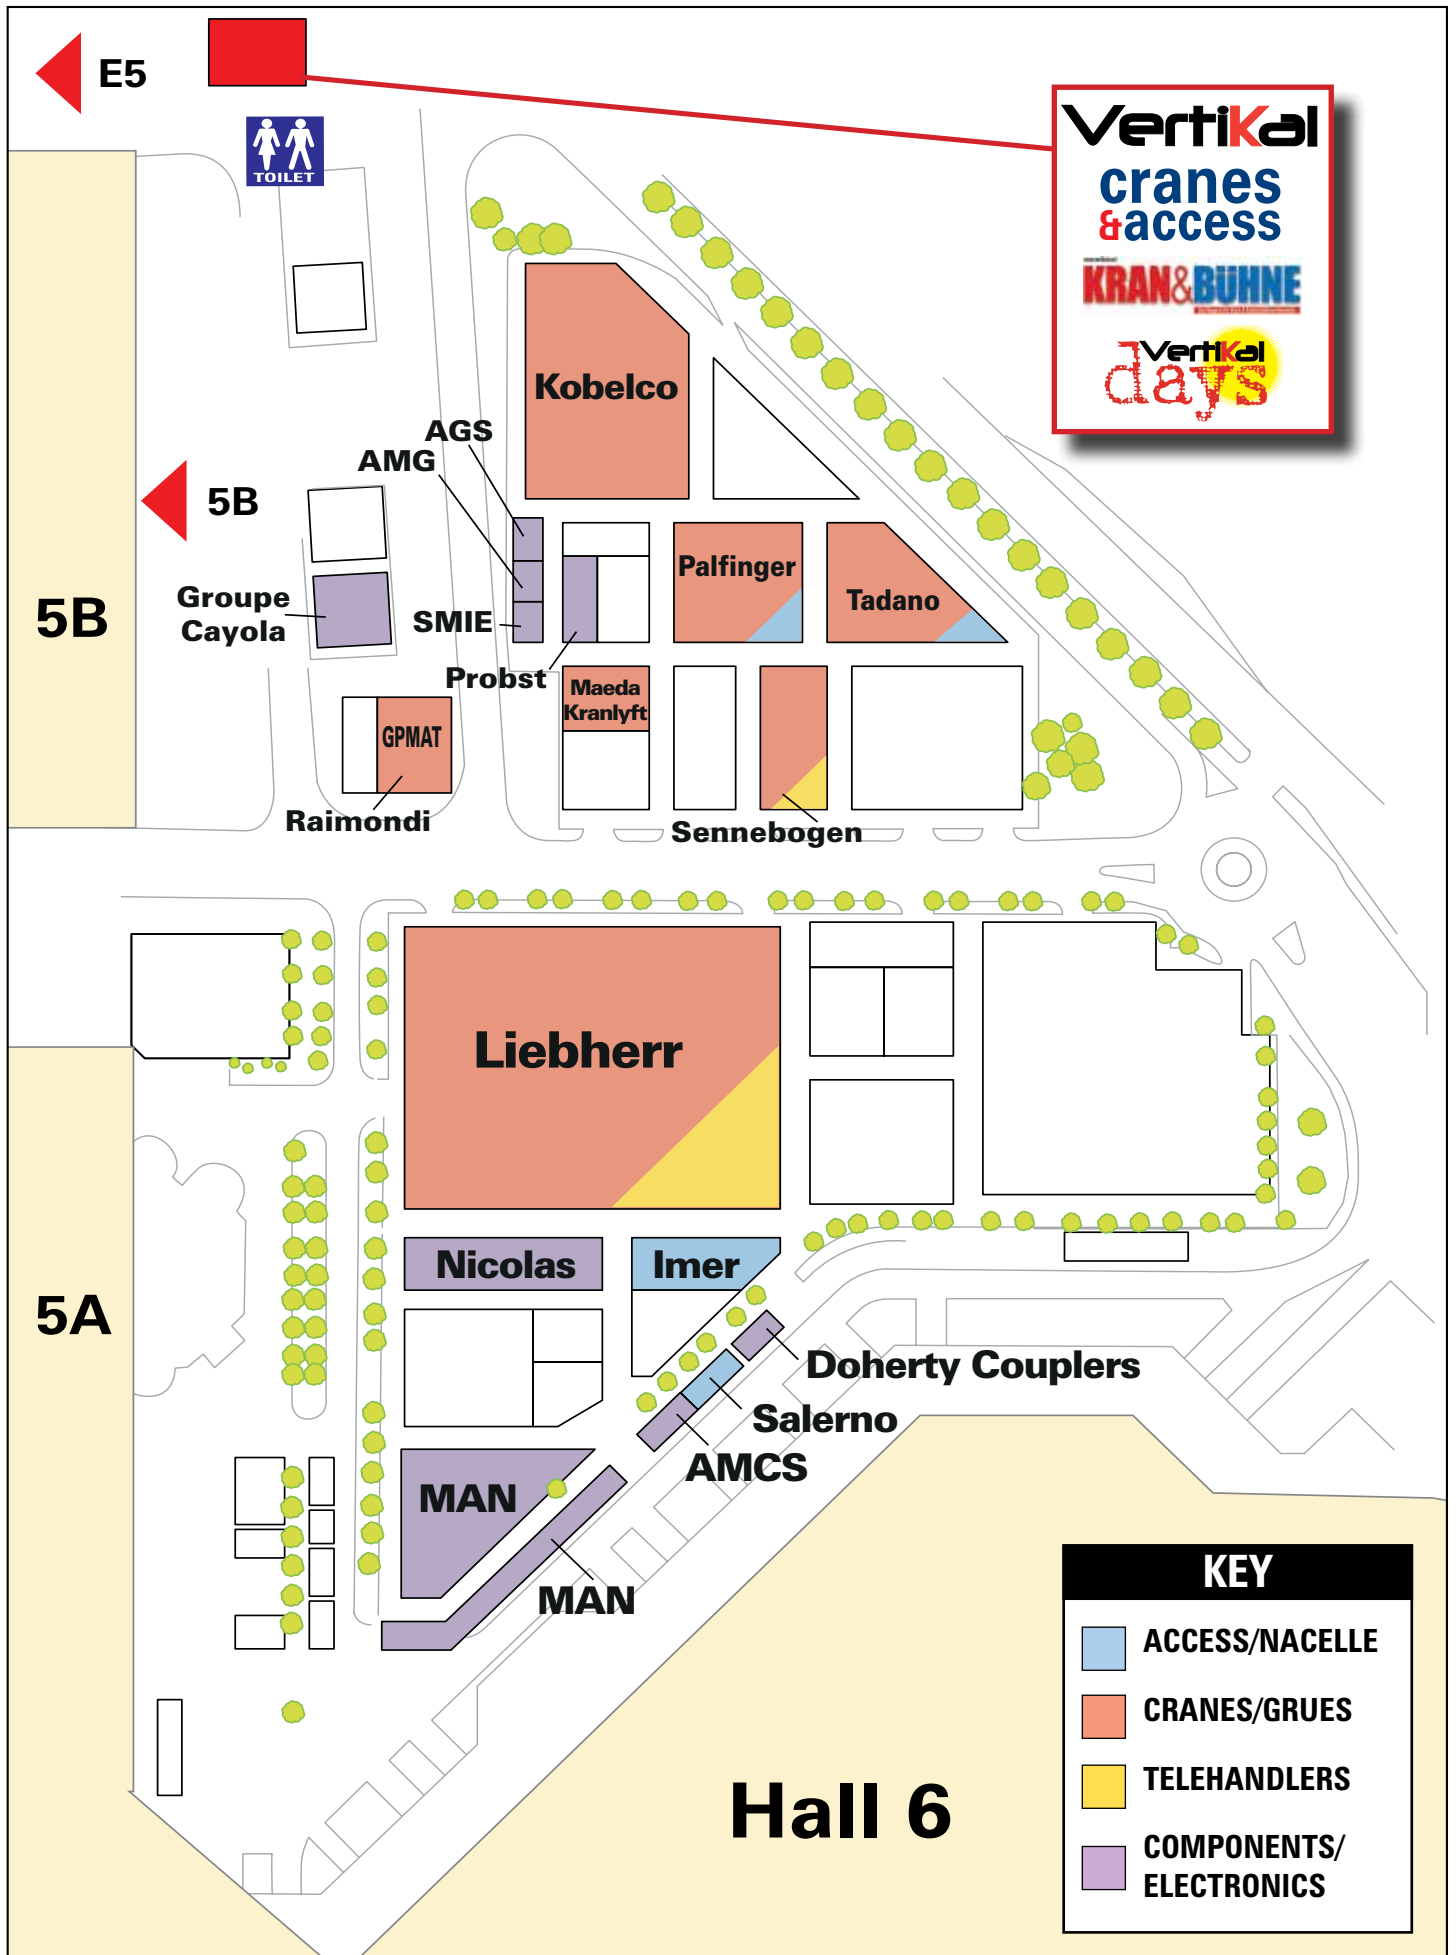

Take your business to the next level with the new Demag AC 300-6. It delivers class-leading reach combined with strength, including the ability to lift 15 t on a fully telescoped 80 m boom. To allow for high versatility, the AC 300-6 can be adapted to the needs of a variety of jobs and is the smallest crane in the Demag AC range with a luffing jib. The HAV and many components are shared with Demag 5-axle cranes—increasing your return on investment and reducing the amount of spare parts you need to have on hand.

Above. Ahead. Always.

GROVE[®]
by **Manitowoc**

NEW GMK5150L

ANY LIFT. ANYWHERE.

The strength and mobility to handle more jobs.

The new GMK5150 and GMK5150L deliver great ROI due to outstanding lifting capacities and greater jobsite accessibility.

- 150 t maximum capacity
- Narrow 2,75 m width on 445/95R25 tires
- Fuel-efficient single-engine design

Impressive lifting, jobsite maneuverability and fuel efficiency help you achieve greater profits.

Contact your local Grove dealer, or go to www.manitowoc.com to learn more.

NEW GMK5150

LIFT CAPACITY ADVANTAGE

*Preliminary load charts, on radius with maximum counterweight

Class-leading lifting capacities in full and taxi counterweight configurations

GMK5150L with high-performing boom capable of lifting 11,8 t with 60 m boom; ideal for tower crane rigging
GMK5150 with 51 m boom

Compact dimensions with reduced overall length and width

Crane Control System (CCS) with Boom Configurator enhances operator control and efficiency

Easy operator access on the crane for secure, fast rigging; especially when working at heights

The ultimate answer to overall efficiency

23-28 APRIL 2018, PARIS

Holland Lift presents its new smart models: HL-160 and HL-190. The concept is designed for tailored efficiency. A modular system with various options: 16 or 19m high, electric, diesel or hybrid; the base of the machine always remains the same. These scissor lifts have attractive exploitation costs and a high return on investment. And whatever configuration you choose, Holland Lift quality, safety and durability are as always part of the deal.

HOLLAND LIFT
innovation at great height
