More ALLMI training moves online

In the interests of reducing physical contact and time on site during this extraordinary period, ALLMI will be delivering more of its course theory elements online. The move follows the transfer of ALLMI's Appointed Person (AP) and Manager (AP and Thorough Examiner only) courses to an online format in May, which has proven hugely popular. Chief executive Tom Wakefield said: "Providing the AP and Manager training remotely has been very successful, so we are now looking at delivering the classroom aspects of our Crane Supervisor, Thorough Examiner and Instructor courses online too. We have also extended this option to our training providers in relation to the delivery of theory elements for Lorry Loader Operator and Slinger/Signaller courses."

Someone who has recently benefited from the online format is Shabbir Ahmed Khan of Saudi Real Estate Infrastructure, one of Saudi Arabia's leading contractors, who said: "I have been following the progress of ALLMI for some time and was delighted to access their Appointed Person course remotely. The training was excellent, the instructor was clearly very knowledgeable and he delivered the comprehensive course content incredibly well, in a manner which was easy to understand. The online format worked perfectly, not in any way detracting from the quality of the training and the whole experience has provided me with a deeper understanding of the subject, which will serve me well in my role."

One of ALLMI's recent online Appointed Person courses.

All courses to resume in July

Delivery of ALLMI's Crane Supervisor, Thorough Examiner and Instructor training will resume in July after a hiatus of more than three months. Whilst on site practical training forms a key part of each course, classroom elements will take place online wherever possible. The reintroduction of this training means that the full suite of ALLMI courses will be available for the first time since March.

Courses available from ALLMI are as follows:

Booked through an ALLMI Training Provider:

- Lorry Loader Operator
- Slinger / Signaller

Booked with ALLMI directly:

- Crane Supervisor
- Appointed Person
- Thorough Examiner
- Manager - PUWER 9.2
- Instructor

Contact ALLMI or visit www.allmi.com for further details.

EN 12999 update

The latest revision to EN 12999, the European product design standard for Loader Cranes, is currently undergoing the 'Final Vote and Approval to Publish' stage. If passed, publication is scheduled for October/November this year. The new standard will contain amendments covering a range of areas, including safety systems on remote controls, stability testing, and improved mapping against the Essential Health and Safety Requirements of the Machinery Directive.

HSE Safety Alert - air suspension systems

ALLMI has made its members aware of a HSE Safety Alert aimed at those carrying out, or responsible for, work on vehicles with air suspension systems. Its release follows HSE investigations into several serious incidents. To view the guidance visit: www.allmi.com/hse-safety-alert

BSI distributor status

Standards development is a core ALLMI activity, and adherence to standards is fundamental to ALLMI membership. The association has a long established and mutually valued relationship with the British Standards Institution (BSI), which led to a distributor agreement in 2019, allowing ALLMI to provide members with a 20 percent discount on BSI documents, while non members can benefit from a 10 percent reduction when ordering through the association. Contact ALLMI for further details.

App usage increases

User sessions of the ALLMI App increased by 40 percent during the association's last financial year, demonstrating its reputation as an invaluable industry tool. Demand has continued in 2020 and thousands now use the App to assist them in their day to day roles.

Free of charge and compatible with iOS and Android operating systems, features include:

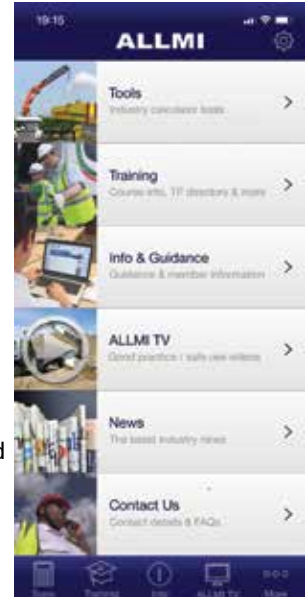

- Details of ALLMI's range of training courses.
- Guidance documents.
- Good practice / safe use videos.
- ALLMI member and training provider directories.
- The latest industry news.
- A course booking facility for accredited instructors.

The ALLMI App also contains a range of tools aimed at those planning lifting operations or carrying out Thorough Examinations. Lift planning tools allow the following to be calculated / established:

- Whether a lift falls into the hired and managed or contract lift category, and whether a site visit is required in advance of the operation.
- Vertical loads placed on stabiliser legs.
- Pad sizes required for a particular lifting operation.
- Sling selection when handling cabins or containers.
- The sail effect of wind on a given load.

Thorough Examiner tools facilitate calculations for overload, stability and sink rate tests, as well as RCI / RCL calibration.

To download the App, visit the Apple or Google Play store.

Home page of the ALLMI App.
