

# HIGH TECHNOLOGY AT THE SERVICE OF SAFETY

The AB46RJ allows work-at-height fluidly, efficiently and in great safety, thanks to the consolidated and reliable technology that distinguishes all Sinoboom platforms.

Great performance: working height of 48.6 m, basket capacity of 455/275 kg, continuous 360° turntable rotation, 40% gradeability and more. It also guarantees excellent maneuverability and high stability at height, thanks to the extendable axles.

Dieci electric 26.6

**Telehandlers are one of the more represented lifting related products at this year's show, even though the two largest manufacturers - JCB and Manitou - are not attending. Despite this there are plenty of new products to see. The main areas are Hall 5b - alongside the Vertikal booth and directly outside in External area 5.**

Starting in Hall 5b with **Ausa** and its updated micro telehandlers. The company pioneered the telehandler that can be transported on a two axle trailer and is updating its products to keep ahead of new entrants. If you are visiting from North America, Ausa produces JLG branded version of its products.

Next stop is **Bobcat** with its updated 360 degree models built by Magni with numerous improvements and developments. Also check out the latest version of its TL25.60 compact model, before moving on to **Merlo** with its new 3,000kg/7m P30.7 compact model, available in two versions L and standard, both of which include Merlo's new patented suspended cab.

Moving on to **Dieci** which has a new all-electric 2,600kg/6m compact telehandler with lithium battery pack, sufficient to run all day on a single charge. Also, take a look at its updated Pegasus 'Elite' 360 degree range. We now head outside to see **Magni**, which has

plenty of innovations to talk about including new 360 models, one of which has an elevating cab. Also check out its first compact model - the 3,000kg/6m TH3.6 - which you can be sure will include numerous innovations and features.

Next stop on our tour is **Sany** to see the first models in its new line up of European telehandlers, starting with two 4,000kg models - the 14 metre STH1440 and 18 metre STH1840. Finally stop by **Zoomlion** to see its all-new 2,500kg/6m ZTH2506 compact model, and ask about its plans for further models, possibly even an electric version.

Magni TH 36 fixed telescopic

Sany

Bobcat TL25.60

suffisant pour travailler toute la journée avec une seule recharge. A voir également sa gamme améliorée de Pegasus Elite 360°. Nous nous dirigeons maintenant vers l'extérieur pour voir **Magni** qui a de nombreuses innovations à voir, incluant de nouveaux modèles 360°, l'un d'entre eux disposant d'une cabine surélevée, ainsi que son premier modèle compact TH 3.6, de 3,000kg/6m. Vous pouvez être certains que tous les modèles présents comportent de nombreuses innovations et fonctionnalités.

Le prochain arrêt de notre visite est effectué chez **Sany** pour apprécier les nouveaux modèles de sa gamme européenne de chariots télescopiques. Pour commencer avec des modèles de 4.000kg, le 14 mètres STH 1440 et le STH 1840 de 18 mètres.

Finalement arrêtons-nous chez **Zoomlion** pour voir son tout nouveau modèle compact ZTH 2506, de 2,500kg/6 mètre

**Cette année, à Intermat, les chariots télescopiques sont les plus représentés, même si les deux plus grands constructeurs, JCB et MANITOU ne sont pas présents. Malgré cela, il y a beaucoup de nouveaux produits à voir.**

Les principaux pavillons sont le hall 5B, à côté du stand Vertikal, et directement à l'extérieur Zone 5.

En commençant par **Ausa** et ses mini téléchargeurs améliorés. La compagnie a été le pionnier dans le transport de chariots élévateurs sur remorque à deux essieux et a constamment amélioré ses produits pour garder une longueur d'avance
