GLAD REMINDER

A reminder that the Global Lifting Awareness Day (GLAD) will take place on 18th July. ALLMI will once again be a partner for the event, the aim of which is to promote the lifting industry, with particular emphasis on good practice, compliance, innovation, and attracting new recruits to the sector.

Visit <https://globalliftingawarenessday.com/> for further details.

BS 7121 UPDATE

The draft for public comment window of the revised BS 7121 Part 2-4 'Code of practice for the safe use of cranes - inspection, maintenance and thorough examination - Loader cranes', will close on June 24th. The BSI panel of industry experts responsible for the draft will meet in July to begin the comments resolution process.

With the Part 2-4 project approaching its conclusion, the revision of BS 7121 Part 4 'Code of practice for the safe use of cranes - Lorry loaders' will get started over the coming months, and a BSI panel, led by ALLMI technical manager Keith Silvester, has already been formed for this purpose.

Further updates to follow in future issues of ALLMI Focus.

DRIVING FOR BETTER BUSINESS (DFBB) REMINDER

ALLMI continues to be a valued 'strategic partner' for Driving for Better Business (DfBB). DfBB is a government backed National Highways programme utilising free online resources and tools to help employers in both the private and public sectors reduce work related road risk, decrease the associated costs and improve compliance with legislation and guidance.

Keith Silvester said: "Educating on the safe stowage and travel of lorry loaders has always been an important part of ALLMI's activities and so in this regard our values are very much in sync with those of DfBB. We fully support its aims and objectives and are committed to promoting the initiative throughout the lorry loader industry."

RECORD DEMAND FOR AP TRAINING

The importance and credibility of ALLMI's Appointed Person (AP) course continues to grow, with the association experiencing record demand for the training during its 2023/24 financial year, and uptake increasing by more than 50 percent so far this year.

Algeco's senior project manager Peter Brown is a long time ALLMI AP cardholder and said: "The ALLMI card has a five year expiry and so I recently attended my third ALLMI AP course to keep my qualification up to date. The training continues to be excellent, with the instructor having invaluable knowledge of lifting operations and lorry loaders. Furthermore, each time I attend it's impressive to see how the course has evolved, which is a testament to ALLMI's commitment to ongoing review and development of its training material."

Since its launch 14 years ago, the ALLMI AP programme has gone from strength to strength, and made a significant impact on practices throughout the lorry loader industry, becoming a pivotal factor in helping fleet owners train the relevant members of their workforce to the highest standard. It is the UK's only accredited AP course dedicated to lorry loader lifting operations and is fully compliant with the requirements of LOLER, as well as BS 7121 Part 4.

ALLMI MEMBERSHIP MEETINGS 2024

ALLMI's annual meetings for all members of the association (manufacturers, importers, service companies, fleet owners, ancillary equipment suppliers and site operators) will take place on October 17th at the Forest of Arden Hotel & Country Club in Meriden, Birmingham.

Speaking of this year's event, chief executive, Tom Wakefield said: "We look forward to bringing all corners of the lorry loader industry together, at a venue that has provided an excellent setting for many successful ALLMI events. As always, the membership meetings will facilitate valuable discussion and debate on a wide range of issues affecting the lorry loader industry, in addition to updates concerning numerous projects and activities being undertaken by ALLMI throughout this year."

"We also look forward to welcoming Jamie Davies, H M principal specialist inspector (mechanical engineering) for the HSE. Jamie will present on various topics, including the subject of thorough examinations and, in particular, how related reports received by the HSE are processed and dealt with. This will be looked at through the lens of the company performing the thorough examination, as well as from the equipment owner's perspective."

"Our preparations will continue to take shape and we look forward to keeping members, as well as the wider industry, informed of developments in due course."
