- Manager - PUWER 9.2
- Appointed Person
- Instructor
- Thorough Examiner

ALLMI training providers supply the following courses:

- Lorry Loader Operator
- Slinger/Signaller

Course information, dates and training provider details can be found at www.allmi.com/training

ALLMI TV CAMPAIGN

ALLMI has launched a campaign to promote its collection of good practice videos, which are freely available on the 'ALLMI TV' section of its website. Among the videos now accessible is the 'Safe Use of Lorry Loaders'. Intended to complement periodic and ongoing formal training and assessment, the video addresses the applications of 'Hook', 'Builders Merchants' and 'Utilities' and covers the following:

- Legislation, Standards & the Lifting Team Hierarchy
- Siting the Loader
- Pre-Operational Checks
- Safe Operation
- Safe Travel

ALLMI chief executive Tom Wakefield said: "We are delighted to make this content readily obtainable via ALLMI TV and to remind the industry that this area of the website also features videos concerning swing-up stabiliser safety and the safe use of remote controls."

"To further distribute this important good practice content, we have made a range of campaign tools available for members and the wider industry to utilise, including postcard literature and QR code stickers."

ALLMI is providing the following free of charge:

- Postcard Literature: including a QR code linking to ALLMI TV (as well as information concerning ALLMI's Guidance material on the reverse) and designed for insertion into lorry loader handover packs/documentation. These postcards are available in hard copy and digital format.
- QR Code Stickers: designed for affixing to lorry loaders, the stickers are 114mm (H) x 74mm (W), made from weather-proof external grade vinyl and contain a QR code linking to ALLMI TV.
- Standalone QR Code: The ALLMI TV QR code contained in the above is also being provided as a standalone graphic for companies to utilise and incorporate into their own literature.
- Email Signature Graphic: ALLMI staff will use an email signature graphic to assist with campaign promotion and this is also being offered to members.

Wakefield added: "We hope the industry will join us in spreading this important message and we would encourage stakeholders to contact us, should they wish to order a quantity of postcards or stickers, or if they have any related queries."

ALLMI TO HOST HOSASS ONLINE SEMINAR

On 13th December, ALLMI will host an online seminar on the Industry Lifting Lead AP Group's 'Hands Off, Step Away, Safe Space' (HOSASS) campaign. The campaign aims to improve practices in relation to personnel/load interfaces during lifting operations and the group has produced a range of supporting material, including a guidance document, poster and video, all of which can be accessed via: illapg.com/updates-downloads-links/

Whilst ALLMI is hosting the event, the core presentation will be delivered by Costain's chief engineer and 'designated individual for lifting', Tom Pawson, who is also a co-chairman of the Lead AP Group and played a primary role in the development of the HOSASS campaign.

Keith Silvester, also a co-chairman of the Lead AP Group said: "We look forward to welcoming Tom, who will be explaining the origins of the HOSASS campaign, the resources that are freely available and what the lorry loader industry can expect in terms of site requirements."

If you're interested in attending, please email enquiries@allmi.com

The Industry Lifting Lead AP Group was formed in 2015 to encourage collaboration and co-ordination between working groups, associations, governing bodies, contractors, owners and suppliers. Its aim is to support lifting industry improvements through the development and promotion of guidance and training, ultimately making lifting operations safer and more efficient.

ALLMI AT SAFED CONFERENCE

ALLMI technical manager Keith Silvester presented at the SAFed Annual Member Conference, which carried the theme 'Change'. He talked about the lorry loader industry's work on swing-up stabiliser safety, particularly in terms of product development, training and guidance, as well as the collaborative way in which this was achieved.
